pg retries explode at hot keys (A and F overlap;
det and Merkle: 0 retries everywhere)
A: 50% read / 50% update
B: 95% read / 5% update
F: 50% read / 50% read-modify-write
pg serialization retries per statement (log)
10^{0}
10^{-1}
10^{-2}
10^{-3}
10^{-4}
0 retries at skew 0 and 0.5
0.0
